

SPOTLIGHT ON WINTER PEST CONTROL

Winter 2013

TERMITES IN THE WINTER? You bet!

ADVANCE Termite & Pest Control employs knowledgeable professionals to help you solve your pest management problems. Although many pests are dormant during the winter months, this is a good time of year to have one of our technicians provide a termite inspection for you. Termites are not active in the winter in Kansas; however, it is often during the winter when a termite infestation becomes more evident in homes.

Our company has been in business since 1985 and our certified applicators have an average of 12 years' experience in termite and pest management.

Our company is fully insured and licensed by the Kansas Department of Agriculture, and all of our employees are certified Kansas applicators who receive ongoing training as the pest control industry continues to evolve in this technological age.

Call our office to schedule a termite inspection this winter so that you can get the jump on termites before spring!

Antennae straight or curved with segments beadlike

Middle part of body broad

Wings similar in size and shape

Termite

Antennae bent or "elbowed"

Middle part of body narrow

wings unlike in size and shape

Ant

Everyone is a genius. But if you judge a fish on its ability to climb a tree, it will live its whole life believing that it is stupid. - Albert Einstein
