## CHECKLIST FOR HEAT TREATMENT OF FURNITURE AND/OR PERSONAL ITEMS IN INFERNO TRAILER

The following checklist details the steps for preparations to be undertaken for the successful remediation of a bed bug infestation. All items will be examined and inspected by the treating technician(s).

All clothing and bed linens should be laundered, dried and placed in plastic bags prior to treatment.

Items placed in the trailer will be heated to a temperature of between 130 degrees and 150 degrees for several hours.

Customer should remove any pressurized cylinders, aerosol cans, paints and flammable liquids. Any cushions, frames, mattresses, cabinets and desks should remain in place.

Common heat-sensitive items/materials may include, but are not limited to the following:

Wax, chocolate, Olefin carpet, certain adhesives, aquariums (fish and pets), aerosol cans, creams and lotions, wine or other alcoholic beverages, certain electronics (at approximately 150 degrees), oil paintings, medication, silk clothing, perishable items (fruits, vegetables), cologne or perfume and empty plastic bottles (pop or water).

If necessary, any of foregoing items can be placed in a refrigerator to protect them during the remediation service.
