

# SPOTLIGHT ON WINTER PEST CONTROL

*ADVANCE* Termite & Pest Control

Winter 2017

*ADVANCE* Termite & Pest Control employs knowledgeable professionals to help you solve your pest management problems. Although many pests are dormant during the winter months, this is a good time of year to have one of our technicians provide a termite inspection for you. Termites remain active in the winter in Kansas; and it is often during the winter when a termite infestation becomes more evident in structures.

Our company has been in business since 1985 and our certified applicators have an average of 12 years' experience in termite and pest management.

*ADVANCE* is fully insured and licensed by the Kansas Department of Agriculture, and our employees are certified Kansas applicators who receive ongoing training as the pest control industry continues to evolve in this technological age.

Advance's personnel meet periodically to address additional ways of meeting our customers' needs for lawn care, insulation and termite, insect and rodent control.

**MONEY FLOATING AWAY**

Insulating your home is the best means of saving money every month on utility bills. According to the Department of Energy, 30-45% of all energy wasted is lost through the roof and walls of a home. The fact is, when cellulose insulation is properly installed by a professional insulation contractor, no other energy improvement investment is recouped faster.

*ADVANCE* Pest Control now offers the installation of cellulose pesticide insulation to help you save money on utility bills and make your home or workplace more quiet and comfortable, with the added benefit of controlling insect infestations in the areas where insulation is applied. Call our office today for an estimate or more information. 620.662.3616 or 800.536.3614
